Art Unit: 2111

1. Claims 31-34 and 39-43 remain for examination.
2. The abstract of the disclosure is objected to because the current abstract does not reflect the inventive feature of the claimed invention to distinguish over the prior art. Correction is required. See MPEP § 608.01(b).
3. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the *control logic and method of assigning priority to a first thread based on the determination that instruction fetch operations for it will be blocked due to processing of instructions for a second thread* must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

4. Claims 31-34 and 39-43 are rejected under 35 U.S.C. 102(b) as being anticipated by Doing et al, U.S. patent No. 6,018,756.

The rejection is respectfully maintained for the reasons set forth in the previous office action incorporated herein by reference.

5. Applicant's arguments filed January 28, 2005 have been fully considered but they are not persuasive.

Applicant argued that the reference does not teach assignment of a priority and the determination that operations of one thread will block processing of instructions in another thread.

The reference teaches in the portion cited by the applicant, col. 19, lines 37-49, that T0 keeps on processing, thus blocking the processing of T1, to a certain point, at

Art Unit: 2111

which point T1 is given a higher priority and switch to T1 occurs (so that excessive number of execution cycle is not wasted).

Thus, the cited portion clearly teaches both the blocking (of processing T1 instructions by T0) and assigning (T1) a priority (for switch).

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
